

GAS AUTOMATIC METER READING

Introduction

AMR Modem is an intelligent device connected to Gas Meter by means of Pulse/RS485. These smart metering systems are cost efficient & works with any gas meter with pulse/RS485 output. The modem that collects information from gas meter should transmit the information to the control center over GSM network using GPRS communication technology.

Architecture

Features:

- Data communication through GSM/GPRS.
- Inbuilt watch dog for reliable communication.
- Remote configuration through SMS.
- IP Protected
- Inbuilt Battery.
- DOTA (Download Over the Air).
